*Critical Global Semiotics: Understanding Sustainable Transformational Citizenship* incorporates powerful unifying frameworks which make explicit a developing global consciousness. It explores transdisciplinary 'common wealth' through focus on multimodality, media and metaphor, testing two universally-applicable humanitarian frameworks: Critical Realism (CR), and Systemic Functional Semiotics (SFS). The book's integrative, unifying foundations will be of interest to researchers, academics and post-graduate students in the fields of linguistics, semiotics and critical realist philosophy, as well as to policy makers, curriculum developers and civil society.
